

Thin Wall Conduit Fittings (for EMT Conduit)

Compression Type Fittings – Steel

COMPRESSION TYPE FITTINGS – STEEL

Applications:

Thin wall conduit fittings are used:

- To join EMT to a box or enclosure
- To couple two ends of EMT conduit

Features:

- Compression type
- Threadless
- Male hub threads – NPSM
- Steel locknuts
- Heavy steel walls
- Standard material: steel
- Standard finish: zinc plated

Concrete Tight Straight Connectors – Insulated

Available in 7 Colors

Painted EMT Fittings are available in seven colors to accommodate a wide range of circuit identification. Typical applications for using color for identification include: fire alarm circuits, low voltage, intrinsically safe circuits, voice and data, and additional voltages. In addition to circuit identification, these can also be used in architectural design to better match look and feel to architectural specifications and preference.

Part Number Example:
