Refer to chart on page E-22 for a list of cable types.

Concrete tight when taped.

PATENT PENDING.

## FEATURES AND BENEFITS

- Low cost – saves time and money!
- Fast and Easy to install. There's no need to remove the strap...just loosen the screws and insert the bushing that works best with the cables you're installing.
- Our zinc die-cast fittings cost much less than steel or malleable iron fittings
- Reduces inventory – comes with additional end stop bushings!
- Built-in end stop in fitting

\* Examples of 3- and 4-conductor cables. Cable dimensions vary dramatically between manufacturers. It is recommended that cable O.D. (outer diameter) be measured to ensure proper cable-to-fitting installation.

Each fitting has an end stop, but comes with additional end stop bushings to accommodate several cable sizes!

## Installation Instructions

If you are using an end stop bushing, determine which one to use by sizing it to the cable bundle (not the metal jacket). **Incorrect size shown above.** The metal jacket should never go through the end stop.

Insert the appropriate end stop bushing, making sure that the half-moon shape is positioned at the top of the connector.

No need to remove strap – simply loosen the screws and insert end stop bushing, if necessary. Slip connector onto MC cable. Retighten screws on strap.
