

General Alarm Siren

Model A

ELECTRO-MECHANICAL SIREN

- Available with 120VAC/VDC universal motor
- Rugged, durable and corrosion-resistant
- Maintenance-free
- Produces 103dBA @ 10' (113dBA @ 1m)
- Type 3R enclosure
- UL and cUL Listed and FM Approved

The Federal Signal Model A is a general-purpose electro-mechanical siren that produces a distinctive sound and tonal quality for industrial applications. It has a high maximum pitch which provides excellent contrast to industrial ambient noise. Introduced in 1918, the Model A is still used today in many rugged and extreme environments and applications.

The Model A features a universal motor and operates with 120VAC or 125VDC. The fractional horsepower motor drives a ported aluminum rotor within the specially designed stator to produce a unique sound. A small internal fan cools the motor during operation. The recommended duty cycle is five minutes on/five minutes off. This siren produces an attention-getting 103dBA @ 10' (113dBA @ 1m) and 1060Hz at full R.P.M.

The Model A's metal housing is sealed with red powder coat for an attractive appearance and superior corrosion-resistance. The swivel mount bracket accommodates wall and surface mount installations.

The Model A is UL and cUL Listed and FM Approved.

Model	Voltage	Operating Current	Decibels @		Frequency
			10'	1m	
A-120	120VAC/VDC	1.9 amps	103	113	1060Hz
