Cold-rated arc flash protection with cut resistance that resists oil and water

### ABOUT THE PRODUCT

Our Endura® 378GOBTKL goatskin gloves keep hands warm down to -15°C / 5°F and are ideal for non-energized work where arc flash is present and oil resistance is a must. Made with material designed to resist flame, they are arc flash rated level 4 with an ATPV of 52 cal / cm<sup>2</sup>, offer ANSI 2 heat resistance, and feature a ParaActiv™ engineered yarn liner to provide 360° cut protection with high ANSI A5 cut resistance. These gloves are treated with Oilbloc™ to resist oil and water, while the palms are unpadded for steady grip and a better sense of feel when performing tasks.
