

## 2024 transition to the NEW 120V Hardwire Combination alarm with Battery backup

### Kidde is introducing

Part number 21032311 model: 900-CUAR-VCA

### 120V AC Talking Photoelectric Smoke & Carbon Monoxide with Front-Load 9V Battery Backup

### 900-0213 – discontinued

**Photoelectric Technology** – Combines the detection of Photoelectric technology with that of an electrochemical carbon sensor. Photoelectric technology may detect visible fire particles (associated with slow smoldering fires) sooner than ionization sensors.

**Voice Warning** – Announces the hazard type detected (in English and French). Announces “FIRE!” when a fire hazard is detected and announces “WARNING! CARBON MONOXIDE!” when a CO hazard is detected. “LOW BATTERY” when it is time to replace the batteries.

**120 V Interconnectable** – Will interconnect with up to 24 other devices. (18 of which can be initiating)

**9 V Front-Loading Battery Backup** – Change the battery without removing the unit from the ceiling, providing continuous protection in the case of a power outage.

**End of Life Notification** – Ten (10) years after unit is first powered, this alarm will beep two times every 30 seconds to indicate it is time to replace the alarm.

**Peak Level Memory** – If alarm has detected a CO level of 100ppm or higher since it was last reset, the voice alarm will announce “CAUTION, CARBON MONOXIDE PREVIOUSLY DETECTED”

Part Number: 900-0213  
Case pack : 6

Hardwired Smoke & Carbon Monoxide Voice Alarm, Interconnectable with AA Battery Backup

### 21032311

**Photoelectric Smoke Sensor** - Can detect visible fire particles associated with slow smoldering fires sooner than an ionization sensor.

**Electrochemical CO Sensor** - Provides accurate carbon monoxide detection during the product's life, remains stable during temperature and humidity changes and resists reactions to household gases that may cause false readings or reduce sensitivity.

**Voice Warning** - Clearly alerts “Fire! Feu!” when a smoke or fire hazard is present, “Warning! Carbon monoxide! Attention! Monoxyde de carbone!” when CO is detected, or “Low battery. Pile faible”.

**AC-hardwired with 2 AA Battery Backup** - Powered by home's electricity in order to provide reliable detection. AA batteries provide smoke & carbon monoxide alarm backup power during short-term power outages.

**Self-Testing** - Smoke & CO alarm is equipped with components that are always checking to ensure the device is operating as expected.\*

**Whole-home Alarm Activation** - Expand detection via hardwired connections to other Kidde alarms – when one alarm sounds, they all do.\*\*

**Easy-Install Mounting Bracket** - Included in the box for simple, quick installation in 4 orientations.
