

Victorian style lamps are especially well suited for warm colors and natural materials such as wood and brick, but also give character to any fixtures and existing settings whether they are rustic, modern, industrial, zen, eclectic or traditional.

These **retro-chic** lamps enhance fixtures made of transparent glass or styled with bare sockets that will **bring out the filament, the shape of the lamp.**

Because of their beauty and the warm glow they produce, Victorian style lamps are an **ideal lighting choice** for houses, restaurants, retail stores or offices.
