

Thermalgard® Protective Caps

Thermalgard Slotted Caps are intended for use in elevated temperatures. The glass-reinforced nylon shell has a beaded edge for improved rigidity.

Thermalgard Caps meet all applicable requirements for a Type I (top impact) helmet as outlined in ANSI/ISEA Z89.1-2009 (Class G) and CSA Z94.1-2005 (Class G). These caps also meet the voluntary standard for reverse donning and low temperature [LT] as prescribed by ANSI/ISEA Z89.1-2009. Look for the official reverse donning logo  to determine if your hard hat may be worn backwards without voiding approvals.

MSA can customize your helmets with your company logo and choice of reflective striping. For more information regarding logos and stripes, contact **MSA Logo Express at 1.800.MSA.LOGO.**

Ordering Information

Thermalgard Helmet Assemblies

Color	w/1-Touch® Suspension	w/Fas-Trac® Suspension

⚠ WARNING

Do not mix suspension and helmet sizes. Make sure the sizes match (example: standard size suspension with standard size helmet). Use only MSA suspensions on an MSA helmet. **Failure to comply with the above will reduce the energy-absorbing ability of the protective helmet, which can result in serious injury or death.**
