Palm Coated Gloves made with Dyneema®

#S13SXPUQ

**Dyneema®**  
The softer strength

A best seller, our Superior Touch® gloves made with Dyneema® feature polyurethane coated palms. They offer unparalleled cut protection, especially considering how highly dexterous and flexible they are. Dyneema® is one of the strongest fibers in the world, 15 times stronger than steel on an equal-weight basis, and twice as strong as Kevlar®. Gloves knit from Dyneema® have a characteristic slipperiness to them, which aids in cut-resistance, because a blade tends to slide over the surface. By adding a coat of polyurethane, the grip is improved. The 13-gauge, lint-free, continuous filament yarn, means not only do you get a finely knit glove with excellent cut protection, you also get a non-linting glove that, combined with great dexterity, making them ideal for working with everything from circuit boards to food. Washable and bleachable (under 145°C).

CFIA approved for food handling.
