M18 FUEL™ Blower (Tool Only)

★★★★★ 3.8 (11) [Write a review](#)

The M18 FUEL™ Blower has the power to clear from 15 ft, gets to full throttle in under 1 second, and is up to 4 lbs lighter than competitors. Designed to meet landscape maintenance professional needs, the POWERSTATE™ Brushless Motor and REDLITHIUM™ HIGH DEMAND™ 9.0 Battery (sold separately) deliver 450 CFM and 120 MPH output. The blower features a variable speed trigger and high/low speed settings for increased control. The high setting is for the most demanding applications and low is optimized for clearing debris from flower beds without moving mulch. The lock on button allows the blower to be locked on to full throttle, so the operating hand can be relaxed reducing fatigue. The M18 FUEL™ Blower is fully compatible with 150+ solutions on the M18™ system.

Great tool

I got this after I purchased my house, I already own Milwaukee fuel impact, drill and saw so just purchased the tool since I have plenty M18 batteries and two chargers. Use it to clean my driveway porch and even to dry my cars after washing them it's a great tool. Battery life with my 4amp is about 10 minutes full throttle. I just pop another full battery and in less than 5 seconds im right back at it. I do agree with others on a smaller attachment to provide a faster more

direct stream. I'm sure that will be fixed soon. Milwaukee is made to perform so that been said it does serve it purpose highly recommend its

Yes, I recommend this product.

Best Cordless Blower Ever

I purchased this blower to replace my old corded unit. I was thrilled when I saw it on the Milwaukee site, I've got a bunch of M18 tools, so I only need to purchase the tool. This blower has plenty of power, and as long as you keep extra batteries around, it will handle any household job. The unit is lite enough to be comfortable to carry, I prefer to use the smaller batteries as the larger ones add extra weight, I don't mind changing the batteries a bit more.

Good blower, uses battery quickly

This is a great little blower, but it uses batteries quickly. I made the mistake of trying it with some of my other M18 batteries and it overheated them. The 4.0 battery overheated and was dead in a few minutes. The 2.0 battery lasted less than one minute. I called Milwaukee & they said only use the 9.0 battery with outdoor accessories.

Yes, I recommend this product.

Nice blower

Nice blower, I have owned Milwaukee tools for years and was confident in this blower before I bought it. I am not disappointed. It is all I need. I use the smaller battery that came with my cordless drill and it powers this blower just fine. The high speed option is nice too. It doesn't drain the battery like I thought it would, lasts longer than expected. After mowing the lawn I use it to clear the porch, sidewalk, driveway and even the garage. The wind here blows right into the garage so I get sand and leaves constantly and this blower is a nice sweeper too. I am satisfied with this product.

Yes, I recommend this product.

Decent tool but need a more narrow outlet

As another reviewer mentioned, it sucks up batter in 10-15 minutes and the outlet is too wide open. It need to have a smaller outlet to force a stronger stream. It's a gift from my son so don't tell him!

No, I do not recommend this product.

Best Blower, Ever.

I keep this tool in my RV, and use it daily to remove leaves, and rocks from my walking area, so it doesn't track into my rv.

Yes, I recommend this product.

I should have bought a cheap electric blower

This thing will drain a 9.0 m18 battery in 10-15 minutes and has no power because of the huge open tube with no option for attachments. I pulled my old \$40 black and decker blower, that this was supposed to replace out of my shed and this is collecting dust. If Milwaukee offered a replacement tube that would force the air better this would be a better product. since this is just a wide open tube, it is useless.

No, I do not recommend this product.

compareable to a gas blower

Great blower, no gas, no pull start, gets the job done, kids can use it. Unit will easily tip over when set down. Timed several 9.0 batteries and unit will run a solid 20 minutes.

Yes, I recommend this product.
