M18™ Compact Heat Gun (Tool Only)

★★★★★ 4.7 (3) [Write a review](#)

Heat Connections Quickly. Anywhere, Anytime. 30% Faster Heat Up Than Corded Most Compact, Stand & Hang One Charge, 40+ Connections The M18™ Compact Heat Gun performs applications quickly by reaching operational temperature in less than 7 seconds. As the most compact electric heat gun among market leaders, it can go places where corded heat guns can't. The guarded nozzle provides increased protection for work surfaces and the ladder hook allows users to easily hang the tool between applications. Powered by REDLITHIUM™ battery technology, it is able to heat over 40

connections on a single XC5.0 battery, anywhere, anytime without the hassle of cords. The M18™ Compact Heat Gun features REDLINK PLUS™ Intelligence with a

Skill Level: **Avid Do-It-Yourselfer**

Last winter I was unable to access my tools since my puck locks froze up. Going to a job and having your equipment locked up is no fun, thankfully I got one of the locks open but I had to move a lot of stuff out to get to my items that were closer to my other door with the froze lock. Not wanting to do

Gender **Male**

risk having both of my locks freeze up and not accessing my tool I used this heat gun. This year the same thing happened where it got so cold the locks where inoperable. I applied heat for 15-20 seconds and thankfully it worked. I plan on keeping this nearby for the winter time, especially in the event that my pipes freeze up

Handy as a pocket on a shirt.

I'm a diesel/crane mechanic. I use this for heat shrink and heat shrink connectors. It doesn't get as hot as my plug in one, but it shrinks it just fine and it's super convenient. It gets hot very fast.

Purchased As Gift: No

I like this heat gun, it works great

I needed a new heat gun for using when labeling wires with shrink tube. The tool works well. It does go through batteries a little faster than I expected but still worth it. My only feedback is that I wish the TOOL ONLY came with the heat guard as this is a big part of using a heat gun.

Yes, I recommend this product.
