

ABOUT THE PRODUCT

These cowgrain leather mitts meet the ANSI/ISEA 107-2015 standard for high visibility, thanks to cuffs that feature 3M™ retroreflective silver strips and high-viz bands. They've been treated with Waterstop™ to repel water and oil, and their Thinsulate™ lining retains warmth down to temperatures of -15°C / 5°F . Durability is assured through double-leather palm patches in high-wear areas. Lined with DuPont™ Kevlar® fiber, these mitts provide 360° cut protection
