

## Safety Padlock

**Part Number:** 51339

**Color:** Red

**Display UoM:** Pack of 6 Each

## OVERVIEW

Safety Padlocks from Brady® have nonconductive fiberglass-reinforced nylon bodies and unique key cylinders that prevent electricity from traveling from the shackle to the key.

- Padlocks feature lightweight, nonconductive fiberglass-reinforced nylon bodies, hardened steel shackles and tamper-resistant 6-pin cylinders
- These lightweight padlocks comply with all OSHA requirements and offer superior temperature, chemical and corrosion-resistance
- Non-conductive safety padlocks are a preferred alternative to metal locks for lockout applications
- Each padlock is keyed differently with keys precision-machined to exacting standards, so that the key for one lock will not open another in the set
