Very Cool Tool (Figuratively)

This tool heats in seconds. I like the led light that indicates when it is hot, it also stays red when you turn it off to let you know it is still hot. I also like that there is no heat exhaust like on a butane soldering torch. I highly recommend this tool.

⊕ Pros: Heats fast, LED indicator for hot and cool
Purchased As Gift: No

☑ Yes, I recommend this product.

Poor design..

this product is like using a baseball bat.. its bulky and heavy and unbalanced. I wish i could say more.. than that. i hold have hold they when with a pen like design with a battery pack or something a bit more field ready. this thing is only good to solder ends of loose wires or something big but you will mess up or burn off any IC or pads if you use this.
