

In-Line Heater Inside-the-Pipe Heating Cable

**Maintain Water supply
throughout the winter in
your home, cottage or barn.**

The EASY HEAT IN-LINE HEATER provides economical, effective in-pipe freeze protection for water supply lines. The cable consists of dual conductor resistance wire with PVC insulation, continuous ground braid, and clear food-grade outer PVC jacket. A 12 Amp energy saving thermostat c/w Ground Fault Circuit Interrupter (G.F.C.I.) receptacle is also included.

FEATURES

- User friendly plug-in installation
- Energy saving thermostat
- GFCI with test/reset and pilot light
- Flexible cable provides easy installation
- Effective and economical operation
- CSA approved for drinking water supply
- Comprehensive size selection from 10 ft to 270 ft
- Non-restrictive Tee assembly fitting (no 90° turn)
- Will not burn through pipe if dryout occurs (*see instructions*)
- 120 Volt operation (5W/ft)
- Designed for standard CSA approved, 1 1/4" PE pipes. Adaptor kits (Part No. 10561-001) available for 1" pipes.

Catalog No.	Watts	Length (ft)	Amps	Resistance (Ohms)
